

The background of the cover is a photograph of a yellow CAT bulldozer working on a dirt construction site. The bulldozer is positioned in the center-left, with its blade lowered. The image is slightly faded to allow the text and geometric shapes to stand out. Large, overlapping geometric shapes in shades of blue, gold, and yellow are layered over the right and bottom portions of the image.

COMPANY PROFILE

ABOUT US

ELEZULU CONSTRUCTION was established in 2006 as a result of the successful implementation of the **Vuk'uphile Contractor Development Programme**, which is Government's initiative of the Expanded Public Works Programme designed to build capacity among emerging contractors in an attempt to address the country's infrastructure backlog, skills shortage and unemployment gap.

ELEZULU CONSTRUCTION is a **100% black woman** owned 7CE PE, 6GB PE and 5ME PE graded construction company, with extensive experience in infrastructure development. We specialize in water solution services within the municipal, industrial and commercial sector and have extensive experience in road construction, general building, and mechanical engineering.

ELEZULU CONSTRUCTION has its head office in KwaMhlanga in the Thembisile Hani Local Municipality area and has a satellite office in Emakhazeni (Belfast) and Pretoria.

We pride ourselves in taking responsibility for quality, delivering customer satisfaction, providing leadership as a company and as individuals, acting with integrity, valuing our people and regarding our suppliers as essential team members.

FOUNDER

Nokuthula Mahlangu

Founder and CEO of ELEZULU Construction, a company she started while participating in one of South Africa's Government initiative of the Expanded Public Works Programme. This programme is designed to build capacity among emerging contractors in an attempt to address the country's infrastructure backlog, skills shortage and unemployment gap.

Nokuthula grabbed the opportunity, and used her then limited knowledge and experience to learn, persist and steadily grow her company to a multimillion rand brand. She employs 10 permanent staff members and depending on project size, employs over 100 employees contributing to the socio-economic development goals of her community and country. To her, business is about creating jobs and impacting her community in a positive and progressive manner.

Nokuthula is a faith driven, goal-oriented businesswoman with a passion and desire to build, create and learn. She is confident and bold and does not allow situations circumstances to limit or define her. She has a project management qualification with Rosebank Academy, a Higher Certificate in Economic Management with UNISA and is currently completing her BCOM qualification in Entrepreneurship with UNISA.

In addition to her managing her business, Nokuthula is an intercessor and loving wife and mother to her children. She enjoys reading, and empowering women and youth to find their true purpose in order to succeed in all areas of their lives.

Her mantra:

Prayer breaks barriers and opens doors, for when you know who you are in God nothing is impossible.

OUR SERVICES

ELEZULU CONSTRUCTION offers civil engineering, general building and mechanical engineering services, construction, and maintenance.

CIVIL ENGINEERING

- Water and Sanitation
- Bulk water pipelines
- Water control valves and pressure management
- Chlorine system and water laboratory test

Service pledge

MISSION STATEMENT

To actively contribute to Africa development and improvement in the quality of living standard of our rural and previously disadvantaged communities by:

- Employing the local members of the communities we operate in
- Empowering communities through skills transfer, mentorship, training and coaching
- Allowing for innovation, research and creativity in our service application
- Promoting excellence, and ensuring quality service delivery that is efficient and cost effective

VISION

Building a brand that will assist with skills transfer and upliftment - a solution to poverty stricken citizens of our beautiful country.

OUR VALUES

Our values give meaning and purpose to our company. They define our behaviours, traits and our beliefs:

Character

We operate ethically with respect, honesty and integrity focusing on quality results.

Community

We change our people's lives, create job opportunities, sustain growth and create wealth

Excellence

We follow through on our commitments exceeding customer expectations.

Safety & Quality Driven

We prioritize the safety of our team providing a healthy work environment ensuring the delivery of quality workmanship.
